

Don't Guess

DO A
**SOIL
TEST**

If you...

- Grow crops or forage
- Apply fertilizer
- Want to maximize yield

Get a FREE Soil Test

Find out your:

- Current nutrient levels
- Crop-specific nutrient needs
- Soil pH & recommended adjustments
- Customized fertilizer rates (lb/acre)
- Fertilizer N-P-K ratios

Use Soil Testing to:

- Improve crop yield and quality
- Find the right fertilizer for your crop
- Reduce fertilizer costs and waste

See back for
instructions

When should you do a soil test?

- Test 3-6 months before any new plantings or applications of fertilizer
- Test once a year to track changes in soil health

How do you get a test for free?

- Pick up a sample bag and instructions at your county Extension or NRCS office
- Follow the instructions to collect a soil sample
- Return the soil sample and completed form to your county Extension or NRCS office
- Results will be sent by email for free
- Review the results with your Extension agent or NRCS conservationist
